

Trimble Access / Spectra Origin Class- Novi, Michigan

Course Description: This course is designed to teach novice to intermediate user's how to effectively use Trimble Access with both GPS and Conventional survey equipment. We will start with an overview of the software to familiarize newer users to the software layout before getting into more of the functionality. The afternoon will be spent using the software in a field environment performing many of that task discussed in the classroom.

Topics Include:

Trimble Access Layout	Projects
Managing Job files	Creating/Editing Job files
Coordinate Systems	Site Calibrations
Survey Styles	Importing/Exporting Data
Working with Feature Codes	Measure Codes
Stakeout	COGO Tools

Prerequisite: Student must have a data collector running Trimble Access 2022.xx
